06/2024 - Present Tigard, OR

- Provided personalized tutoring sessions for students of various age groups in math and technical subjects
- Conducted assessments to identify individual learning needs and tailored educational approaches accordingly
- Developed and implemented customized educational strategies to enhance student understanding and performance
- Utilized effective communication and presentation skills to explain complex concepts clearly
- Monitored student progress and adjusted teaching methods as necessary to ensure academic success
- Collaborated with students to identify and address areas of difficulty, providing additional support and resources as needed
- Demonstrated proficiency in adapting teaching techniques to meet the diverse needs of learners

Website Developer

Personal Project

2020 - Present Tigard, OR

- Built a portfolio website using a variety of coding languages to present myself online.
- Utilized PHP, HTML, JS and CSS.
- Experience with both building and debugging errors found in all four coding languages.
- Implemented software design and development for the portfolio site to make sure user experience was excellent.

EDUCATION

Computer Science

Oregon State University

09/2023 - 06/2027 Corvallis, OR

- Actively Pursuing a Bachelor of Science degree in Computer Science from a renowned university, with a focus on Software development and algorithmic problem-solving. Courses covered a range of topics including data Structures, operating systems, computer networks, and programming languages such as Java, Python, and C++
- Actively involved in extracurricular activities related to computer science, including being a member of Hackathon Club and Out in Stem Club. These experiences furthered my learning outside of a classroom environment and helped prepare me for my future career
